

Dawit Temesgen Arage

Full Stack Engineer

Jimma, Ethiopia +251 920 386 003 philopatertech@gmail.com github.com/DawitTemesgen1 philopatertech.com

PROFESSIONAL SUMMARY

Full Stack Engineer with a strong focus on **creativity** and **system design**. Builds complete web and mobile products — from user experience to backend architecture and deployment. Skilled in React, Node.js, Flutter, SQL databases, REST APIs, Docker, and CI/CD. Delivered live platforms for education, marketplaces, and community organizations, including a mobile app with 10,000+ downloads and 500+ daily users. Known for turning complex real-world problems into simple, scalable systems and communicating clearly with both technical and non-technical teams.

TECHNICAL SKILLS

Strengths	Creativity, system design, problem solving, end-to-end product thinking
Frontend	React, JavaScript, TypeScript, Material UI
Backend	Node.js, Express, Fastify, REST APIs, JWT authentication
Mobile	Flutter, Dart
Databases	PostgreSQL, MySQL
DevOps	Docker, GitHub Actions, Linux VPS, cPanel
Tools	Git, Google Play Console
Languages	JavaScript, TypeScript, C++, Dart

AI-POWERED DEVELOPMENT

Daily use of AI-assisted development tools to build faster and with higher quality — including **Cursor**, **Claude**, **OpenCode**, and **Antigravity**. Applied in production work for coding, system design, content automation, and project delivery. This resume was also created with **Cursor**.

PROFESSIONAL EXPERIENCE

Full Stack Engineer

2022 – Present

Philopater Tech · Jimma, Ethiopia

- Develop and maintain full-stack web and mobile applications from design through deployment.
- Build REST APIs, database structures, and secure authentication for multi-user platforms.
- Publish and manage mobile apps on Google Play, including releases and store listings.
- Deploy and maintain production servers on VPS and cPanel hosting environments.
- Set up CI/CD pipelines with GitHub Actions for automated deployment.
- Design connected systems — website, mobile app, Telegram bot, and admin tools working as one platform.
- Work with clients and non-technical stakeholders to turn requirements into working software.

SELECTED PROJECTS

Amde Haymanot Sunday School Platform

Official website and admin portal for a Sunday school serving 300+ students. Used for announcements, events, courses, gallery, enrollment, and multilingual content.

Stack: React, Node.js, MySQL

amdehaymanot.com · overview.amdehaymanot.com

Amde Haymanot Telegram Bot

Student support bot for Sunday school learners. Gives access to national curriculum books in PDF, supplementary study materials, and 100+ practice questions with answers. Also lets users submit hymns (lyrics and audio) through chat,

guides them with an AI assistant in 8 languages, and automatically turns Telegram channel posts into website news and events after review.

Stack: Node.js, MySQL, Telegram Bot API, AI automation

Amde Haymanot Zimare — Hymn App

Mobile hymn app for the Ethiopian Orthodox Church with 2,400+ hymns in Amharic and Afaan Oromoo, available offline for daily worship and practice. Currently live on Play Store with 10,000+ downloads and 500+ daily users. The next update — already built — connects the app to the Telegram bot and admin system so new hymns can be submitted, reviewed, and published in one workflow. Awaiting Sunday school approval for release.

Stack: Flutter, Node.js, MySQL, Telegram Bot API

Akilesiya — Sunday School Management

Multi-school platform for managing students, teachers, attendance, grades, and learning materials. Designed as a scalable system for multiple Sunday schools to operate on one platform.

Stack: Flutter, Node.js, MySQL

play.google.com/store/apps/details?id=com.akilesiya.app

Yesra Sew Solution — Marketplace

Ethiopian marketplace for jobs, homes, cars, and tenders. Users browse and access listings on the web or through the mobile app, both connected to the same backend. Includes premium listings, verified categories, and a marketplace experience built for the Ethiopian market.

Stack: React, Node.js, Flutter

yesrasewsolution.com · play.google.com/store/apps/details?id=com.yesrasewsolution.app

Alefeign — Multi-Vendor E-Commerce

Online marketplace connecting vendors and buyers across Ethiopia with product listings, vendor dashboards, and secure checkout.

Stack: React, Node.js

alefeign.com

TG Focus — Custom Telegram Client

A focused Telegram client that shows only selected groups and channels. Built to reduce noise and improve communication focus — designed and implemented from scratch using the Telegram native library.

Stack: Flutter, TDLlib
